

NERVE4 Wetland Forest Protection Conference in Prague

2023-07-25

Meeting on Wetland Forest Protection in Central Europe, taking place in Prague, Czech Republic. This conference is part of our ongoing project dedicated to mapping the vegetation of wetland forests across the Visegrád Group countries – Czech Republic, Slovakia, Poland, and Hungary.

The representative alder carr site of Hungary was selected from the core area of the [Ócsai Turjános Forest Reserve](#).

[More information about the project can be found here.](#)

The project is financed through Visegrad Grants from the International Visegrad Fund.

.

.

Post-conference excursion was to the **Old-growth alder carr stand, named Černiš.**

Jan Douša talking about the history of the stand.

There are *Hottonia palustris* and *Calla palustris*.
